15
POINTS**

TOPIC: SAFETY AND HEALTH ASSESSMENT SYSTEM IN CONSTRUCTION (SHASSIC) ASSESSOR

1. SUMMARY

Safety and Health Assessment System in Construction or SHASSIC is an independent method to assess and evaluate the safety and health performance of a contractor in construction works/ projects. SHASSIC was developed by a Technical Committee comprises of industry stakeholders. It was published as Construction Industry Standard or CIS 10:2008 in November 2008.

2. OBJECTIVE

SHASSIC was designed and developed to enable the user to achieve any or combination of the following objectives:

- To benchmark the level of safety and health performance of construction industry in Malaysia
- To have a standard system on safety and health assessment in the construction industry
- To assess safety and health performance of contractor(s) based on this standard
- To evaluate the performance of contractor(s) on the safety and health practices at site
- To improve and to take necessary corrective action on OSH performance and management at site; and
- To compile data for statistical analysis

3. WHO SHOULD ATTEND

Safety Practitioner, Project Manager, Site Supervisors, Architect, Consultant And Client
